Internship Program: 3-Week Assignment (21 Days)

Company: Marketer's Touch, Jaipur, Rajasthan

Submitted to:

Marketer's Touch

internshipassignments2026@gmail.com

Year: 2025–26

WEEK 1: Business Understanding & Core Analysis

This section covers the foundational understanding of Marketer's Touch — its identity, offerings, target customers, competition, and internal structure.

Q1. What is the name of your company? Write a brief introduction including its mission and vision.

The name of the company is Marketer's Touch. It is a modern, forward-thinking digital marketing and SaaS-based agency headquartered in Jaipur, Rajasthan, India. The company was founded with the goal of helping businesses of all sizes establish a strong, professional, and impactful digital presence in today's competitive online landscape.

Marketer's Touch is not just another marketing agency — it is a complete brand transformation partner. It combines creativity, strategy, and technology to deliver measurable results for its clients. What sets it apart is its unique approach of 'Image Consulting + Execution', where the company not only designs a brand's identity but also ensures that the brand communicates consistently and professionally across all digital platforms.

Mission:

- To deliver result-oriented, data-driven marketing solutions that help businesses grow sustainably.
- To help businesses build a strong, professional, and recognizable brand identity in the digital world.
- To provide innovative SaaS-based marketing tools and automation solutions that save time and increase efficiency.
- To work closely with clients as a long-term growth partner and ensure measurable return on investment (ROI).

Vision:

To become a leading marketing and brand consulting agency in India and globally, known for transforming businesses through creative strategies, powerful branding, and digital innovation.

Q2. What products or services does the company offer? Explain any 3–5 in detail.

Marketer's Touch offers a wide range of digital marketing and SaaS-based services. Below are five of its key services explained in detail:

1. Digital Marketing Services (SEO, SMM, and Paid Ads):

Marketer's Touch provides comprehensive digital marketing services including Search Engine Optimization (SEO), Social Media Marketing (SMM), and paid advertising campaigns on platforms like Google, Facebook, and Instagram. The company's digital marketing experts create customized strategies based on the client's industry, target audience, and business goals. These campaigns are designed to increase online visibility, drive targeted traffic to the client's website, and ultimately convert visitors into paying customers. The

team monitors performance metrics closely and optimizes campaigns regularly to ensure the best possible return on investment.

2. Branding & Logo Development:

A strong brand identity is the foundation of any successful business. Marketer's Touch offers complete branding solutions including logo design, brand guidelines, color palette selection, typography, and brand voice development. The company ensures that the brand's visual identity is consistent, professional, and memorable. Whether a business is just starting out or looking to rebrand, Marketer's Touch creates a unique identity that resonates with the target audience and differentiates the client from competitors.

3. Image Consulting & Brand Positioning:

This is one of Marketer's Touch's most distinctive services. Image consulting goes beyond just designing a logo — it involves shaping the overall perception of a business in the marketplace. The company helps clients define their brand personality, craft their key messaging, and position themselves effectively in the minds of their target audience. This service is especially valuable for businesses that want to establish authority, build trust, and stand out in a crowded market.

4. SaaS-Based Marketing Tools & Automation:

Marketer's Touch also offers SaaS (Software as a Service) solutions for marketing automation. These tools help businesses automate repetitive tasks like email marketing, social media posting, lead nurturing, and customer follow-ups. By implementing these tools, clients save time, reduce manual effort, and ensure that their marketing activities run consistently and efficiently, even without constant manual intervention. The company's tech team sets up, customizes, and manages these tools for clients.

5. Website & Landing Page Development:

In today's digital world, a website is a business's most important marketing asset. Marketer's Touch designs and develops professional, mobile-friendly websites and high-converting landing pages for its clients. Each website is designed with the user experience (UX) in mind, ensuring that visitors find it easy to navigate, engaging to explore, and compelling enough to take action — whether that means making a purchase, filling out a form, or contacting the business.

Q3. What problem does the company solve for its customers?

In today's digital age, millions of businesses exist online — but very few truly stand out. Many small and medium-sized businesses (SMBs) and startups face a common set of challenges: they don't know how to market themselves effectively, their brand identity is inconsistent or unprofessional, they lack the knowledge or resources to run digital campaigns, and they struggle to convert online traffic into real customers.

Marketer's Touch solves exactly these problems. The company bridges the gap between a business's current digital presence and where it needs to be. Specifically, it helps clients with:

- Building a professional and memorable brand identity from scratch or revamping an existing one.

- Creating and executing effective digital marketing strategies that drive real, measurable results.
- Managing social media accounts and creating engaging content that attracts followers and builds community.
- Implementing marketing automation tools that save time and ensure consistent customer communication.
- Helping businesses understand their target audience and position their brand in a way that resonates deeply.

In essence, Marketer's Touch removes the confusion and complexity of digital marketing for businesses, allowing them to focus on what they do best — running their business — while the agency handles their brand growth and digital presence.

Q4. Who is the target customer of the company? Describe their profile (age, location, needs, etc.).

Marketer's Touch serves a diverse range of clients, but its primary target customers share certain common characteristics:

Business Type:

- Small and medium-sized businesses (SMBs) looking to grow their digital presence.
- Startups and entrepreneurs who are just beginning their brand journey.
- Established businesses wanting to rebrand or modernize their marketing strategy.
- Local businesses in Jaipur and Rajasthan, as well as clients across India.

Demographics:

- Age: Business owners typically between 25–50 years old.
- Location: Primarily Jaipur, Rajasthan; expanding to pan-India and international markets.
- Education: Graduates or above, comfortable using digital tools.

Key Needs:

- A professional brand image that builds trust with their own customers.
- More online visibility and website traffic.
- Effective lead generation and customer acquisition through digital channels.
- Time-saving marketing automation solutions.
- Expert guidance on how to grow their business in the digital world.

Essentially, the ideal client is someone who understands the importance of digital marketing but either doesn't have the in-house expertise or the time to do it themselves, and is looking for a reliable, experienced partner to handle it for them.

Q5. Who are the main competitors of the company? Compare them with your company (1 strength & 1 weakness each).

Below is a comparison of Marketer's Touch with its key competitors in the digital marketing space:

1. WATConsult (India):

- Strength: A highly reputed, large-scale digital marketing agency with a massive client portfolio including top national and international brands. Known for award-winning campaigns.
- Weakness: Being a large agency, they tend to focus on bigger corporate clients and may not give personalized attention to smaller businesses or startups — which is exactly where Marketer's Touch excels.

2. Dentsu India:

- Strength: A global network with deep resources, international expertise, and multi-channel marketing capabilities.
- Weakness: Their global structure makes them expensive and less flexible. Small businesses cannot afford their services and may feel like a low priority in such a large organization.

3. Local Jaipur Marketing Agencies:

- Strength: Local agencies often have a strong understanding of the regional market, culture, and audience preferences, giving them an advantage in local campaigns.
- Weakness: Most local agencies offer only basic services (social media management or simple ads) and lack the specialized image consulting and SaaS integration capabilities that Marketer's Touch provides.

Marketer's Touch Advantage:

Compared to these competitors, Marketer's Touch occupies a unique position — it combines the personalized attention of a boutique agency with the strategic depth of a larger firm. Its signature 'Image Consulting + Execution' model ensures clients receive not just marketing services, but a complete brand transformation experience tailored specifically to their needs.

Q6. What is the Unique Selling Proposition (USP) of the company? Why should customers choose it?

The Unique Selling Proposition (USP) of Marketer's Touch is its 'Image Consulting + Execution' approach. While most marketing agencies focus only on running campaigns or managing social media, Marketer's Touch takes a holistic, brand-first approach. It starts by deeply understanding the client's business, their target audience, and their market positioning before executing any marketing activity.

Customers should choose Marketer's Touch for the following reasons:

- Complete Brand Transformation: Marketer's Touch doesn't just market a business — it builds and transforms the entire brand from logo to content strategy, ensuring a consistent, professional, and powerful identity across all platforms.
- Personalized Approach: Unlike large agencies that treat clients as account numbers, Marketer's Touch works closely with each client, providing customized strategies tailored to their specific business goals.
- SaaS Integration: The company offers advanced marketing automation tools that help businesses work smarter, save time, and maintain consistency in their marketing efforts —something very few agencies in the region offer.
- Result-Oriented Mindset: Every strategy and campaign is driven by data and

focused on delivering measurable results, ensuring clients see a real return on their marketing investment.

- End-to-End Service: From branding and website development to digital marketing campaigns and automation, clients can get all their marketing needs met under one roof, simplifying their operations.

In simple terms, Marketer's Touch is not just a vendor — it is a long-term growth partner that invests in the success of every client.

Q7. What is the organizational structure of the company? Explain hierarchy (CEO to employees).

Marketer's Touch operates with a clear and efficient organizational structure designed to ensure smooth communication, effective execution, and client satisfaction. Here is the hierarchy from top to bottom:

Top-Level Management:

- Founder / CEO: Responsible for setting the overall vision, strategy, and direction of the company. Makes key business decisions and drives overall growth.
- Operations Head: Works directly under the CEO to oversee day-to-day operations, manage resources, and coordinate between different departments to ensure projects are delivered on time.

Middle-Level Management:

- Marketing Manager: Plans and oversees all marketing campaigns, strategies, and client communications. Ensures that marketing goals align with business objectives.
- Creative Director: Leads the branding and design team. Oversees logo development, visual identity, content creation, and ensures all creative output meets quality standards.
- Tech / SaaS Manager: Manages all technology-related functions, including setting up and maintaining SaaS tools, marketing automation systems, website infrastructure, and integrations.
- HR & Admin Manager: Handles recruitment, team management, employee welfare, and administrative operations.

Operational Team:

- Digital Marketing Executives: Execute SEO, paid ads, email marketing, and performance marketing campaigns on a daily basis.
- Content Creators & Graphic Designers: Create engaging social media content, blogs, videos, and visual design assets for clients.
- SaaS Support Team: Assist clients in using automation tools, resolve technical issues, and ensure smooth tool performance.
- Sales & Client Servicing Team: Handle client onboarding, maintain client relationships, manage queries, and ensure overall client satisfaction.

The flat yet structured hierarchy ensures that every team member understands their role clearly, communication flows smoothly between departments, and clients receive prompt, professional service at every touchpoint.

WEEK 2: Marketing, Branding & Communication

This section covers how Marketer's Touch markets itself, communicates its brand, and engages with its audience and clients.

Q8. What marketing methods does the company use to attract customers? List at least 5.

Marketer's Touch uses a variety of marketing methods to attract new clients and retain existing ones. Here are five key methods the company uses:

1. Social Media Marketing:

The company actively uses Instagram, LinkedIn, and Facebook to showcase its work, share marketing tips, post client success stories, and run targeted ad campaigns. Social media is its most powerful tool for building brand awareness and attracting potential clients who are looking for digital marketing services.

2. Content Marketing & SEO:

Marketer's Touch creates and publishes valuable, informative content — such as blog posts, infographics, reels, and how-to guides — that educate businesses about digital marketing. This content not only positions the company as an expert in its field but also helps it rank higher on Google search results, bringing in organic traffic from businesses actively searching for marketing solutions.

3. Referral Marketing & Word of Mouth:

The company's strong focus on client satisfaction naturally leads to word-of-mouth referrals. Satisfied clients recommend Marketer's Touch to their network, which is one of the most trusted and cost-effective forms of marketing. The company also has a structured referral program that incentivizes existing clients to refer new businesses.

4. Email Marketing & LinkedIn Outreach:

The company uses targeted email campaigns and LinkedIn outreach to connect with potential clients directly. These messages are personalized and focus on the specific pain points of the recipient, making them highly effective in generating interest and setting up business meetings.

5. Free Webinars & Workshops:

Marketer's Touch organizes free digital marketing webinars and workshops for small business owners. These events serve a dual purpose — they provide genuine value to participants while also giving the company an opportunity to showcase its expertise and convert attendees into paying clients.

Q9. Write 3 social media captions (Instagram/LinkedIn) for the company's product/service.

Caption 1 (Instagram – Branding Service):

Your brand is the first impression you make — make it count. At Marketer's Touch, we don't just design logos; we craft identities that speak volumes before you say a word. From your brand colours to your social media tone —we make sure every detail tells YOUR story.

Ready to transform your brand? Drop us a DM!

#BrandingExperts #MarketersTouch #DigitalMarketing #LogoDesign #JaipurBusiness #BrandIdentity #MarketingAgency

Caption 2 (LinkedIn – SaaS/Automation):

Are you still manually following up with every single lead? There is a smarter way.

At Marketer's Touch, we implement powerful SaaS-based marketing automation tools that work for your business 24/7 — so you can focus on growing it. Automated emails, lead nurturing, social scheduling, and more —all customized for YOUR business goals.

Let us set it up for you. Connect with us today!

#MarketingAutomation #SaaS #BusinessGrowth #DigitalTransformation #MarketersTouch #Jaipur

Caption 3 (Instagram – General Motivation/Brand Awareness):

In 2025, if your business is not visible online, it practically does not exist. But just being online is not enough —you need to be visible, professional, and impactful.

That is exactly what we do at Marketer's Touch. We combine strategy, creativity, and technology to put your brand in front of the right people at the right time.

Your digital growth journey starts here. Let's build something extraordinary together.

#MarketersTouch #DigitalMarketing #OnlineGrowth #BrandBuilding #SMM #Startup #JaipurMarketing

Q10. Suggest 5 creative content ideas to promote the company online.

1. 'Brand Makeover Series' on Instagram/YouTube:

Create a video series showing before-and-after transformations of real client brands — from a weak, inconsistent identity to a professional, polished brand. Each episode would showcase the logo redesign, colour palette change, and social media revamp, demonstrating the tangible value of the company's branding services. This type of content is highly engaging and shareable.

2. '30-Second Marketing Tip' Reels:

Post daily short-form video content (Instagram Reels or YouTube Shorts) featuring quick, actionable marketing tips — such as 'How to write a killer Instagram bio', 'The one mistake killing your Facebook ads', or 'Why your website is losing customers'. These highly educational yet entertaining reels can go viral and attract thousands of business owners who are struggling with similar challenges.

3. 'Client Spotlight' Case Studies:

Publish detailed case study posts or carousels showcasing a client's growth journey — with real numbers like percentage increase in followers, website traffic, or revenue after working with Marketer's Touch. This social proof is one of the most powerful tools to build credibility and attract new clients who see exactly what results they can expect.

4. Free 'Brand Health Checkup' Campaign:

Run a campaign where business owners can submit their social media handle or website link, and Marketer's Touch will post a free mini audit on their stories or in the comments — pointing out key improvements. This activity generates massive engagement, builds goodwill in the business community, and creates a pipeline of potential clients who now understand their branding gaps.

5. Industry-Specific Marketing Guide (Lead Magnet):

Create free downloadable guides such as 'The Complete Digital Marketing Guide for Restaurant Owners' or 'How Fashion Brands Can Grow on Instagram' — targeted at specific industries. Promote these guides through ads and social media. When users download the guide, they provide their contact details, creating a high-quality lead list for the company to follow up with.

Q11. Write a short promotional message (3–4 lines) suitable for WhatsApp marketing.

WhatsApp Message:

> *Hi! Are you struggling to grow your business online? At Marketer's Touch, we help businesses like yours build a powerful digital brand — from professional logo design to social media management and automated marketing tools. We are currently offering a FREE brand consultation this week! Reply 'YES' to claim your spot. Limited seats available.*

Q12. Draft a professional email introducing the company to a new client.

Subject: Grow Your Business Digitally – Introduction from Marketer's Touch

Dear [Client's Name],

I hope this email finds you well. My name is Krishna and I am reaching out to you on behalf of Marketer's Touch — a digital marketing and SaaS-based agency based in Jaipur, Rajasthan. We specialize in helping businesses like yours build a strong, professional, and impactful digital presence. Whether you are looking to establish your brand from scratch, improve your social media engagement, run targeted advertising campaigns, or automate your marketing efforts —we have the expertise and the tools to make it happen.
At Marketer's Touch, we believe in a results-driven approach. Every strategy we create is custom-built around your specific business goals, your target audience, and your industry.

Our team of digital marketing experts, creative designers, and SaaS specialists work together to deliver not just services, but real, measurable growth for your business.

Here is a quick overview of what we offer:

- Complete Digital Marketing (SEO, Social Media, Paid Ads)
- Brand Identity & Logo Development
- Image Consulting & Brand Positioning
- SaaS-Based Marketing Automation
- Website & Landing Page Development

We would love the opportunity to understand your business better and share how we can help you achieve your growth goals. I would be happy to schedule a complimentary 30-minute consultation call at your convenience.

Please feel free to reply to this email or reach us at:

- Email: internshipassignments2026@gmail.com
- Website: www.marketerstouch.in
- Instagram: @marketerstouch

Thank you for your time, and we look forward to the opportunity of working with you.

Warm regards,
Krishna
Intern | Marketer's
Touch Jaipur, Rajasthan,
India

Q13. Write a 60-second elevator pitch explaining the company.

60-Second Elevator Pitch:

"Hi, my name is Krishna, and I work with Marketer's Touch — a digital marketing and SaaS-based agency based in Jaipur, Rajasthan.

Here's the problem we solve: most businesses today have a great product or service, but they struggle to communicate that value to the right audience online. Their brand is inconsistent, their social media is inactive, and they have no system to generate and nurture leads automatically.

That's exactly where we come in. At Marketer's Touch, we do three things really well — first, we build powerful, professional brand identities through our image consulting service. Second, we run highly targeted digital marketing campaigns that drive real results. And third, we implement smart marketing automation tools that work for your business even when you're not.

We don't believe in one-size-fits-all solutions. Every strategy we create is custom-built for your specific business, your industry, and your goals. We've helped multiple businesses in Jaipur and beyond grow their digital presence significantly.

If you're a business owner looking to grow online, I'd love to have a quick 30-minute conversation to understand your challenges. I guarantee you'll walk away with at least three actionable insights you can use immediately—whether you work with us or not.

Here's my card. Let's connect!"

Q14. Suggest 3 improvements to make the company's branding more professional (logo, website, etc.).

Improvement 1: Redesign the Logo for Versatility & Timelessness:

While the current Marketer's Touch logo communicates the brand, a more versatile, minimalist redesign could enhance its professional appeal significantly. A great logo needs to look equally good in a tiny 16x16 pixel favicon as it does on a large billboard. I would suggest simplifying the logo to a clean, iconic mark — perhaps a stylized 'MT' monogram or an abstract symbol representing digital growth — paired with a modern, professional typeface. The colour palette should be refined to two or three primary colours that work well in both digital and print formats. A logo that is simple, versatile, and memorable will make the brand appear more polished and trustworthy to potential clients.

Improvement 2: Develop a Comprehensive Brand Guidelines Document:

One of the most important (and often overlooked) tools for professional branding is a brand guidelines document. This document specifies exactly how the brand should be represented across all channels — including logo usage rules, colour codes (HEX, RGB, CMYK), official fonts, tone of voice, and visual style examples. Having clear brand guidelines ensures that every piece of content, every social media post, and every client-facing document maintains a consistent look and feel, which dramatically increases the perceived professionalism and trustworthiness of the brand.

Improvement 3: Revamp the Website with a Focus on Social Proof & Conversion:

The company's website should be its most powerful marketing tool. I would suggest a revamp that incorporates three key elements: First, a prominent 'Results' or 'Portfolio' section showcasing real client case studies with measurable outcomes (e.g., '150% increase in Instagram engagement' or '40% growth in website traffic'). Second, clear, compelling calls-to-action (CTAs) on every page that guide visitors towards booking a consultation or contacting the team. Third, client testimonials and trust badges (such as Google ratings or industry certifications) prominently displayed to immediately build credibility with first-time visitors. A fast, mobile-optimized, conversion-focused website will significantly increase the company's ability to turn website visitors into paying clients.

WEEK 3: Customer, Operations & Growth Strategy

This section focuses on social media's role in industry growth, content strategy, customer engagement, feedback mechanisms, and strategic recommendations for business growth.

Q15. How does social media impact the growth of this industry? Explain in detail.

Social media has fundamentally transformed the digital marketing and brand consulting industry. In the early days, businesses relied on traditional advertising — print ads, television commercials, and word of mouth — to reach their audience. Today, social media platforms like Instagram, LinkedIn, Facebook, and YouTube have become the primary battleground where brands are built, audiences are engaged, and businesses are grown.

For a company like Marketer's Touch, social media's impact can be understood across several dimensions:

1. Lead Generation & Client Acquisition:

Social media is now the most powerful lead generation tool for digital marketing agencies. By consistently posting valuable content, showcasing client results, and running targeted ad campaigns, Marketer's Touch can reach thousands of potential clients who are actively looking for marketing solutions. LinkedIn, in particular, is invaluable for connecting with business owners and decision-makers.

2. Brand Authority & Credibility:

In the marketing industry, your own brand is your best portfolio. When Marketer's Touch maintains an active, professional, and engaging social media presence, it serves as living proof of its capabilities. Potential clients look at the company's own Instagram, LinkedIn, and website before deciding to hire them — a strong social presence instantly boosts credibility and trust.

3. Real-Time Market Research & Trend Tracking:

Social media platforms provide instant access to trends, audience preferences, competitor activities, and industry news. For a marketing agency, staying on top of these trends is critical to delivering relevant, effective strategies for clients. By monitoring social media, Marketer's Touch can continuously refine its service offerings and stay ahead of the competition.

4. Client Showcase & Portfolio Building:

Every successful campaign, every brand transformation, and every satisfied client testimonial becomes powerful social media content. Sharing these results builds the company's portfolio in real-time and attracts new clients who can see exactly what kind of results they can expect.

5. Community Building & Long-Term Relationships:

Social media allows Marketer's Touch to build a community of followers — business owners, entrepreneurs, and marketing enthusiasts — who regularly engage with their

content. This community becomes a valuable asset over time, as engaged followers are more likely to become clients or refer others to the company.

In conclusion, social media is not just a marketing channel for Marketer's Touch — it is the backbone of its entire business development strategy. The company that markets itself best on social media will inevitably be the one that attracts the most clients and grows the fastest.

Q16. Suggest 5 educational post ideas that show the company as an expert.

1. 'Common Branding Mistakes That Are Killing Your Business' (Carousel Post):

A multi-slide carousel post that identifies the most common branding mistakes made by small businesses — such as using too many fonts, inconsistent colour usage, no clear brand voice, or a generic logo. Each slide highlights one mistake with a real-world example and a simple fix. This type of educational content is highly relatable for business owners and positions Marketer's Touch as a brand expert.

2. 'How the Instagram Algorithm Works in 2025' (Reel + Infographic):

A short, engaging reel explaining the latest Instagram algorithm updates and how businesses can use this knowledge to increase their organic reach. Backed by an infographic that summarizes the key points, this content demonstrates technical expertise and helps business owners immediately — making them more likely to trust Marketer's Touch for their social media management.

3. 'What is SEO & Why Does Your Business Need It?' (Blog + LinkedIn Post):

A comprehensive, beginner-friendly explanation of Search Engine Optimization (SEO) — what it is, how it works, and why it is critical for any business that wants to be found online. Published as a LinkedIn article and repurposed into bite-sized social media posts. This establishes Marketer's Touch as a thought leader in digital marketing.

4. 'The Anatomy of a High-Converting Landing Page' (Infographic + Story Series):

A visually engaging infographic that breaks down the key elements of an effective landing page — compelling headline, clear value proposition, trust signals, strong CTA, and social proof. This demonstrates the company's expertise in web design and conversion optimization, and helps potential clients understand why their current website might not be generating leads.

5. 'Why Your Business Needs Marketing Automation in 2025' (Video + Blog):

An educational video explaining the concept of marketing automation in simple terms — what it is, how it saves time and money, and how businesses can get started. This content positions Marketer's Touch as a SaaS and automation expert and creates awareness about one of its most valuable (and unique) service offerings.

Q17. Write a short script (30 seconds) for a promotional video/reel.

30-Second Promotional Video Script:

[Scene opens with a split screen — a business owner looking frustrated at their phone, then the same owner smiling at a laptop showing their thriving social media page]

Voiceover:

Is your business invisible online?

[Cut to: beautiful brand elements —logo, social media posts, website —appearing on screen]

Meet Marketer's Touch —Jaipur's premier digital marketing and brand consulting agency.

[Cut to: upbeat montage of the team working, client meetings, design process]

We build powerful brands, run high-converting digital campaigns, and implement smart marketing automation —all tailored specifically to YOUR business.

[Cut to: client testimonial clips and result statistics appearing on screen]

The results? More visibility. More leads. More growth.

[Final frame: Marketer's Touch logo with tagline and contact details]

Ready to transform your brand? Contact Marketer's Touch today. Your digital success story starts here.

[End card: Logo | Website | Instagram | Contact Number]

Q18. Suggest 3 ways to increase the company's social media followers organically.

1. Consistent, High-Value Content with a Clear Posting Schedule:

The most reliable way to grow social media followers organically is by consistently posting content that provides genuine value to the target audience. Marketer's Touch should commit to a structured content calendar — for example, posting daily on Instagram and three times per week on LinkedIn. The content mix should include educational carousels (marketing tips, branding advice), motivational quotes, client success stories, and behind-the-scenes team content. Algorithms on platforms like Instagram heavily favour accounts that post consistently, and users are far more likely to follow an account that regularly teaches them something useful.

2. Strategic Use of Hashtags, Collaborations & Cross-Promotions:

Using the right hashtags increases the discoverability of each post significantly. Marketer's Touch should research and use a mix of high-volume hashtags (broad reach) and niche-specific hashtags (targeted reach) relevant to digital marketing, branding, and business growth. Additionally, collaborating with complementary businesses — such as CA firms, startup incubators, or business coaches — for Instagram Lives, joint posts, or story

takeovers can introduce the company to an entirely new and relevant audience. Cross-promotions are highly effective because both parties benefit from each other's followers.

3. Active Community Engagement —Comment, Reply & Initiate Conversations:

One of the most underrated strategies for organic growth is genuine, active engagement. Marketer's Touch should dedicate time every day to replying to every comment on their posts, responding to DMs promptly, and proactively commenting meaningful, insightful replies on posts by potential clients and industry influencers. This active engagement increases the account's visibility in the feeds of those users and their followers, and also builds a reputation for being approachable, helpful, and knowledgeable — qualities that make businesses want to follow and eventually hire the company.

Q19. List 5 common customer questions (FAQs) and provide their answers.

FAQ 1: How much do your digital marketing services cost?

Our pricing is completely customized based on the specific services you need, the scale of your business, and your marketing goals. We believe in transparent, value-based pricing — you only pay for what you actually need. We offer flexible monthly retainer packages as well as project-based pricing. To get a precise quote, we recommend starting with a free 30-minute consultation where we assess your requirements and suggest the most cost-effective solution for your business.

FAQ 2: How long does it take to see results from digital marketing?

The timeline for results depends on the type of marketing activity. Paid advertising campaigns (Google Ads, Facebook Ads) can start showing measurable results within 1–2 weeks. Social media growth and engagement improvement typically becomes noticeable within 4–6 weeks of consistent activity. SEO (organic search rankings) is a longer-term investment and generally takes 3–6 months to show significant results. We set realistic expectations with all our clients from day one and provide regular performance reports so you can track progress transparently.

FAQ 3: Do you work with businesses outside of Jaipur?

Absolutely! While we are based in Jaipur, Rajasthan, we work with clients across India and internationally. All our services are delivered digitally, so geographic location is never a barrier. We use video calls, project management tools, and cloud-based collaboration platforms to ensure seamless communication and project delivery regardless of where our clients are located.

FAQ 4: What makes Marketer's Touch different from other marketing agencies?

Our biggest differentiator is our 'Image Consulting + Execution' approach. Most agencies will take your brief and run campaigns without deeply understanding your brand or your market positioning. We start by understanding your business from the ground up, help you clarify and strengthen your brand identity, and then execute marketing strategies that are perfectly aligned with who you are and who you serve. We also offer SaaS-based marketing automation solutions that most local agencies do not, giving our clients a significant technological edge.

FAQ 5: Can you help a brand-new business with no existing digital presence?

Yes, absolutely — in fact, we love working with new businesses! Starting from scratch actually gives us the advantage of building your brand correctly from the very beginning, without having to undo inconsistent or unprofessional past work. We offer complete startup packages that cover everything you need: business naming and logo design, brand guidelines, website development, social media account setup and initial content creation, and a launch marketing strategy. It's a one-stop solution to give your new business the professional, impactful start it deserves.

Q20. Design a 5-question customer feedback survey.

Below is a structured customer feedback survey designed to measure client satisfaction and gather actionable insights for Marketer's Touch:

MARKETER'S TOUCH — CLIENT SATISFACTION SURVEY

Thank you for choosing Marketer's Touch! Your feedback helps us serve you better.

Question 1:

On a scale of 1 to 10, how satisfied are you with the overall quality of services provided by Marketer's Touch?

(1 = Very Dissatisfied | 10 = Extremely Satisfied)

Rating: _____ / 10

Question 2:

Did the services provided by Marketer's Touch meet your initial expectations and business goals?

- Yes, fully met my expectations
- Partially met my expectations — there is room for improvement
- No, it did not meet my expectations
- It exceeded my expectations

Question 3:

How would you rate the communication and responsiveness of the Marketer's Touch team throughout the project?

- Excellent — always available and prompt
- Good — mostly responsive with minor delays
- Average — communication could be improved
- Poor — frequently difficult to reach or delayed

Question 4:

Which specific service provided by Marketer's Touch had the greatest positive impact on your business? (Select all that apply)

- Branding & Logo Development

- Social Media Marketing & Management
- Digital Advertising (Google Ads / Facebook Ads)
- SaaS Marketing Automation Tools
- Website & Landing Page Development
- Image Consulting & Brand Positioning

Question 5:

Would you recommend Marketer's Touch to other business owners? Please share any suggestions for how we can improve our services to serve you better in the future.

- Yes, I would definitely recommend Marketer's Touch
- Yes, but with some reservations
- No, I would not recommend at this stage

Your suggestions: _____

Thank you for your time and valuable feedback!

Q21. Suggest 3 strategies to improve customer satisfaction and business growth.

Strategy 1: Implement a Structured Client Onboarding & Communication System:

One of the biggest drivers of client dissatisfaction in service businesses is poor communication and unclear expectations. Marketer's Touch should implement a structured client onboarding process that includes a detailed welcome kit (outlining the project scope, timelines, deliverables, and point-of-contact details), a kickoff call to align on goals, and a project management tool (such as Trello, Asana, or Notion) where clients can see the real-time progress of their projects. Regular weekly or bi-weekly update calls should be scheduled proactively. When clients always know exactly what is happening with their project and feel heard, their satisfaction levels increase dramatically, leading to longer retention and more referrals.

Strategy 2: Build a Client Loyalty & Referral Program:

Happy clients are the most powerful growth engine for any business. Marketer's Touch should formalize a client loyalty program that rewards long-term clients with exclusive benefits — such as priority access to new services, complimentary monthly strategy sessions, or discounts on service renewals. Alongside this, a structured referral program should be introduced where existing clients receive a meaningful reward (such as a free month of service or a cash incentive) for every new client they refer who signs a contract. This approach simultaneously increases client retention and drives new business acquisition in the most cost-effective way possible.

Strategy 3: Develop Industry-Specific Service Packages & Upselling Pathways:

To drive business growth, Marketer's Touch should move beyond generic service offerings and develop industry-specific packages tailored for high-demand sectors such as healthcare, real estate, education, and hospitality. For example, a 'Digital Marketing Package for Real Estate Agents' or a 'Brand Building Package for Healthcare Clinics' would

immediately resonate with business owners in those industries because it speaks directly to their specific needs. Additionally, the company should create a clear upselling and cross-selling pathway — for example, a client who starts with a branding project should naturally be offered a social media management retainer, which can then be upsold to include paid advertising and automation tools. This approach increases the average revenue per client while also ensuring that clients receive a more holistic, integrated marketing strategy.

FINAL REPORT

Part 1: Learning Reflection

What did I learn?

This three-week internship at Marketer's Touch has been an incredibly enriching and eye-opening experience. Before joining this internship, my understanding of digital marketing and business operations was mostly theoretical — confined to textbooks and classroom discussions. This assignment pushed me to apply that knowledge in a real-world business context, and the difference between knowing something theoretically and understanding it practically is immense.

The most significant thing I learned is how a modern marketing agency operates as a complete ecosystem. I discovered that marketing is not just about posting on social media or running ads — it is a deeply strategic process that begins with understanding the business, its audience, and its competitive landscape, and only then moves into execution. The concept of 'Image Consulting + Execution' that Marketer's Touch follows is something I will carry with me throughout my career. I now understand that a brand is not just a logo or a tagline — it is the sum total of every interaction a customer has with a business, and managing that perception consistently is both an art and a science.

I also gained a deep appreciation for the role of SaaS tools in modern marketing. Automation is not just a luxury — it is a necessity for businesses that want to scale without proportionally increasing their workload. Learning about these tools and how they integrate into a broader marketing strategy has given me a significant technological advantage.

Furthermore, the exercise of writing actual marketing materials — social media captions, email drafts, elevator pitches, and video scripts — helped me develop my professional communication skills in a way that no classroom assignment ever could. I learned to think from the perspective of the client and the customer simultaneously, which is a crucial skill in marketing.

What skills did I develop?

- Strategic Thinking: I learned how to analyse a business from multiple angles — its strengths, weaknesses, opportunities, and competitive position — before making any marketing recommendations.
- Copywriting & Communication: Writing captions, email drafts, WhatsApp messages, and video scripts sharpened my ability to communicate ideas clearly, compellingly, and with purpose.
- Brand Understanding: I developed a much deeper understanding of what branding truly means and how every visual and verbal element of a brand contributes to how it is perceived.
- Customer Insight: Creating customer profiles, FAQs, and feedback surveys taught me to think empathetically about customer needs, pain points, and expectations.
- Research & Analysis: Analyzing competitors and writing detailed service descriptions required systematic research and analytical thinking.
- Professional Document Creation: Structuring and presenting a comprehensive business assignment in a professional format is itself a valuable business

communication skill.

What challenges did I face?

The most significant challenge I encountered was writing long, detailed, and original answers for each question without repeating information across sections. The assignment required a comprehensive understanding of all aspects of the business — and ensuring that each answer was thorough, unique, and genuinely insightful (rather than simply restating the company's existing materials) took considerable effort and thought.

Another challenge was writing marketing materials like captions, email drafts, and video scripts in a way that felt natural, engaging, and human — rather than corporate or robotic. Good copywriting is a skill that takes practice, and this assignment gave me my first real experience with it. I had to rewrite several of my initial drafts to make them sound more conversational and persuasive.

Finally, the sheer volume of the assignment — covering 21 detailed questions plus a comprehensive final report — was a significant time management challenge. I had to prioritize, plan my work carefully, and maintain consistency and quality across all sections, which taught me valuable lessons in discipline and structured thinking.

Part 2: Final Suggestions

Marketing Suggestions:

- Launch a 'Free Digital Marketing Audit' campaign where business owners can submit their website or social media handle to receive a complimentary assessment. This creates a massive inflow of leads while demonstrating the company's expertise.
- Invest in LinkedIn content marketing more aggressively. LinkedIn is where most B2B decision-makers spend their time, and consistent thought leadership content (articles, case studies, expert opinions) will position Marketer's Touch as an authority in the digital marketing space and generate high-quality leads.
- Create a YouTube channel featuring detailed marketing tutorials, client success stories, and industry trend analyses. Video content has the highest engagement rate of any content format and significantly boosts brand awareness.
- Develop a referral incentive program for existing clients, offering them meaningful rewards for every new client they bring. Word-of-mouth referrals have the highest conversion rate of any lead source.

Branding Suggestions:

- Create a comprehensive brand guidelines document that standardizes every aspect of the brand's visual identity — logo usage, colours, typography, tone of voice, and visual style. This ensures that every piece of content, regardless of who creates it, maintains a consistent and professional look.
- Develop a signature tagline that is memorable, meaningful, and speaks directly to the core value proposition — for example, something like 'Your Brand. Amplified.' or 'From Vision to Digital Reality.' A great tagline becomes synonymous with the brand.
- Redesign the website with a strong focus on social proof — prominently featuring client testimonials, case studies with measurable results, and a regularly updated

portfolio. The website should serve as the most powerful sales tool in the company's arsenal.

Business Growth Suggestions:

- Develop industry-specific service packages for high-growth sectors like real estate, healthcare, education, and e-commerce. Packages tailored to specific industries are far more compelling to potential clients than generic service lists.
- Expand into Tier-2 cities in Rajasthan and beyond, where the demand for professional digital marketing services is growing rapidly but the supply of quality agencies is still limited. Early market entry in these cities could establish Marketer's Touch as the dominant agency.
- Build and launch at least one proprietary SaaS marketing tool — even a simple one like a social media scheduler or a brand audit tool. Having a proprietary product dramatically increases the company's perceived value and creates an additional recurring revenue stream.
- Establish a strategic partnership with business incubators, co-working spaces, and startup accelerators in Jaipur to gain direct access to early-stage businesses that have marketing budgets and urgent branding needs.

Declaration

I, Krishna hereby declare that this internship assignment has been completed by me independently and to the best of my knowledge and ability. All answers are original and based on my understanding of Marketer's Touch, the knowledge I have gained during this internship period, and my own research and analysis.
